

EVoline® BackFlip

EVoline® BackFlip

Electricity and water - not a problem.

Always available, but never in the way. When closed, the EVoline BackFlip is only a thin panel on the desktop. Push it with a finger and it rotates by 180 degrees to show its useful side:
USB charger and power sockets are

located so far above the panel that they are protected against water running in from the side.

The low installation depth of just 53 mm allows mounting even above drawers or devices.

Available with internationally approved sockets.

Flush mounted installation possible.

Quick assembly in panels of 10 - 40 mm in thickness.

Surfaces match the ambience:

Stainless steel brushed

Plastic metal-coated Brass look

Stainless steel matt black lacquered (similar RAL 9005)

Stainless steel matt white lacquered (similar RAL 9010)

Glass glossy black (similar RAL 9005)
