

Glass Protection

“The ultimate Bathroom Protector on glass”

All Roman's enclosures and bath screens are pre-coated with Roman Ultra Care, our own unique glass protection system. Pre-coated glass protection systems will always diminish in their effectiveness over time, depending on how often the shower is used and how often it is cleaned. Unlike other systems, Roman Ultra Care in a bottle can be used in tandem with the pre-coat to build up the effectiveness and make it stronger the more you clean.

Roman Ultra Care is an award winning bathroom protector and has a 15 year track record for successfully protecting Roman's extensive product range. When applied to the glass of an enclosure or bath screen it creates a chemical barrier which provides protection against the build-up of grime, limescale and stains. The protective barrier means water glides off the glass with ease. This results in the protected surface remaining easy to clean by simply applying a mild detergent and wiping with a damp cloth or using a Roman Shower Blade.

By topping up the glass protection system with Roman Ultra Care in a bottle every time you clean, you can significantly reduce the amount of time required to clean your enclosure and bathroom surfaces. Most importantly, you can considerably prolong the life of your Roman product and at the same time do your bit for the environment by eliminating the use of harsh and damaging cleaning products.

As well as considering the environment during the manufacture of our products, we are also mindful of how our products can impact on the environment after they leave us. The addition of our Ultra Care Pre-coated Glass Protection means that dirt, grime and soap scum are washed away during the shower use. This means the use of harsh chemicals during the cleaning process can be eliminated and less water is required during the cleaning process.

Simulation of glass surface magnified

All glass surfaces have a non smooth finish which can attract the build-up of particles. Roman Ultra Care provides an invisible protective film which seamlessly seals the surface to ensure this build-up does not bond to the glass and the glass retains its optical clarity for lasting sparkle.

Ongoing After Care

To maintain the long lasting sparkle of your Roman enclosure or bath screen and aid the Ultra Care pre-coated glass protection; Roman Ultra Care can be purchased in a user friendly 750ml sized bottle. This can be purchased from your local Roman Bathroom Retailer, or alternatively from www.romanathome.com (UK only).

Roman Ultra Care is not limited to the cleaning and protection of your shower enclosure or bath screen, it can also be used to protect other bathroom surfaces, which are not pre-coated, including glass, tiles, aluminium frames, taps, trays, sinks and baths.

Simply wipe down your bathroom surfaces after use and apply Roman Ultra Care with a soft cloth.

Roman Ultra Care can be used weekly as part of your bathroom cleaning routine.

The more you apply Roman Ultra Care the more protection you create for your enclosure, therefore your enclosure will maintain its high quality finish for longer. Without using Roman Ultra Care, your pre-coated glass protection will diminish over time.

Important information to help you maintain your Roman product:

Ensure you clean your product using a mild detergent diluted in water and then polish off using a soft damp cloth. Apply a coat of Roman Ultra Care after each clean to build-up the protective film on the surface.

If you live in a hard water area, periodically clean your product using a 50/50 solution of white vinegar and water. The solution should be left on the enclosure for approximately 5 minutes then rinsed off using warm water.

1. Do not use acidic based products which are unsuitable for cleaning enamel surfaces.
2. Do not use abrasive cleaners or cleaners containing bleach or solvents, these products will adversely affect the finish of the aluminium profiles.
3. Do not use scouring pads, powder or any sharp instruments when cleaning your Roman enclosure.
