Granberg Lighting Connection Pack - Flexible Cable for Installing Your Own Lights

£63.72 Inc. VAT

Product Code: 61930

Product Images

Description

This flexible spiral cable is for the power supply cable for 24V low voltage under cabinet lights. Designed for the connection between low voltage 24V lights and the power supply and or your transformer or driver of your own lights.

Allows under cabinet lighting to be installed, without risk of cable damage from continued vertical or diagonal movement when installing Granberg Diago 504 and Verti 830 / 831 wall cabinet lifts.

Technical details:

- 850mm overall length
- 400mm spiral cable - extends to 1200mm
- Bare ended 2 core cable with 200mm tails at either end
- For use with Diago 504 and Verti 830 / 831 wall cabinet lifting systems
- It is recommended that an extra power socket / fused spur is installed for the lighting circuit in addition to the socket required to power the cabinet lift

Warranty:

- 2 year manufacturer warranty
