Granberg Left Safety Panel, Short End, for a Baselift 6300 with Cover Panels, Depth 400mm

£119.88 Inc. VAT

Product Code: 61442

Product Images

Description

The Granberg side protection or safety panel will be required if a height adjustable Baselift 6300/6310 worktop lift is going to pass over any adjacent furniture.

By fitting the plate to the side end of the worktop, the gap between the worktop and the furniture below is covered, preventing any possible trapping.

This plate is for the left hand side of the worktop, and is compatible with the Granberg Baselift 6300 of electric worktop lifts that are fitted with cover panels.

Key benefits:

- Side protection panel for rise and fall worktop systems
- Required if the worktop rises above any adjacent furniture
- When the lift is at its highest point the safety panel covers the gap between the end of the worktop frame and any adjacent furniture.
- Compatible with the Granberg Baselift worktop lifts LA and HA
- Depth x Height x Thickness (mm): 400 x 263 x 16
- Fits to the underside of the end support arm
- For a worktop lift with cover panels fitted (Order Product Code: 61444 - When not fitting Cover Panels)
- Concealed fixings
- MDF with white finish
- One plate supplied for the left hand side of the worktop lift

Warranty:

- 2 year manufacturer warranty
