Step 3: Length of lateral grab bar back to wall (max. 950mm)	£0.00

Description

The AWS Chelsea is a premium stainless steel smooth floor to ceiling grab pole with concealed fixing brackets.

Constructed from high quality materials and featuring curved cover plates, the 35mm diameter gives the rail increased strength and stability.

The floor and wall flanges are robustly welded, and the rail is supplied with a loose top flange to make

installation easier. The rail is finished with a hard wearing smooth mirror or sateen polished finish, select as required.

This version of the AWS Chelsea can be supplied up to 2743mm in length, with a horizontal cross bar for lateral support. The horizontal bar can be configured to your exact requirements, including the height off the floor and distance back to the wall for the lateral rail.

Key benefits:

- 304 grade stainless steel support pole with lateral grab rail with a smooth mirror or sateen polished finish
- Concealed fixings with curved stainless steel cover plates
- Bottom and wall flanges welded, supplied with a loose top flange to allow for cutting to the required length on site
- Ideal for wet, damp and moist environments
- Suitable for commercial applications
- Doc M compliant
- Made in Britain
