Whale Instant Match® Transformer Flow Sensor Connections

External flow sensors should be used for mixer showers. An external flow sensor may also be used for electric showers which are not hardwire compatible. Compatible flow sensors and their connections to the transformer are listed below.

Sika® Sensor Connection

Whale® Transformer Settings

Description

Whale SDS263T replacement Sika flow sensor for use with the SDP134T Whale Instant Match, SDP303T Whale Instant Match Premium, SDP113T Whale Digital Smoothflow, and SDP073R Whale Dry-Deck 20 Kit.

One flow switch is required for the cold feed on electric showers and a second flow switch is required for the hot feed on mixer showers.

Compatibility

- SDP134T - Whale Instant Match Kit - External Flow Sensor - models post November 2017
- SDP303T - Whale Instant Match Premium - models post November 2017
- SDP113T - Whale Digital Smoothflow / Mixer Kits - Ultimate Control - models post September 2017
- SDP073R - Whale Dry-Deck 20 Kit - models post September 2017

Technical details:

- Plumb Sika flow sensors to the hot and cold supplies with the arrow pointing in the direction of the water flow
- Do not overtighten the plumbing fittings connected to the Sika flow sensors as doing so may cause leaks
- Supplied with 1m of sensor control cable
- 1x Flow sensor
- Fits 15mm pipework

Please note:

- If you are replacing a "Venturi Flow Sensor" these are now obsolete and may require the a new Control Box for the Sika Flow Sensor
- Please contact Whales technical department for further assistance if you are unsure: 0345 9090 912

Additional Information

Manufacturer	Whale Pumps
Application	Flow Switch / Sensor
Compatibility	Electric (Cold Feed Only), Mixer (Hot & Cold Feeds)
