-----------------------------------	---------------------------------	--------

Description

The Kesseböhmer iMove range has been designed with style in mind. A perfect way to access any wasted space in high cabinets.

The iMove range is a sleek and minimalistic way to bring items down to a reachable level for a standing user.

Please note this product is not designed to be used by people in a seated position.

Key benefits:

- Pull-down 2 tier trays for wall cabinets
- Grab handle, below the bottom tray
- Drop-down height of 340mm
- Concealed hinges
- Metal frame with anthracite finish
- Optional extension handle to increase reach range - 300x124x15mm

iMove Lock Function:

- To reach the lowest loading position, the user must swing the fitting over a certain resistance
- This allows the fitting to engage and stay in the holding position
- Delivered factory set at the lightest level
- If the unladen tray disengages from the holding position, the user can increase the holding force using the switch

- Note: Adjusting this lever does not change the permitted maximum load.

Technical details:

- Number of trays: Two
- For wall cabinet width (mm): 600
- Minimum clear internal cabinet depth required (mm): 267
- Height (mm): 565
- Tray drop down height / minimum height required from worktop (mm): 340mm
- Tray width (mm): 600
- Maximum load per tray (kg): 4
- Finish: Powder coated
- Materials: Metal
- Finish: Anthracite

Product user information:

- To reach the lowest loading position, the user must swing the fitting over a certain resistance. This allows the fitting to engage and stay in the holding position
- The trays are delivered, with the resistance set at the lightest level. Should the unladen tray disengage from the holding position, the user can increase the holding force using the switch
- This does not increase the maximum load

Note:

- The wall cabinet must be securely fixed to the wall
- Some physical effort is required to pull down these shelves, particularly when empty
- Important: The drilling pattern supplied with product must be used - failure to do so may cause fitting issues
- For cabinets with a door, we recommend the fitting of 110° hinges (not included) to allow unobstructive movement of the mechanism

Manufactures Warranty

- Kesseböhmer 10-year warranty
