Product Options

Description

The Diffusion Hunsdon Side 1260x550mm towel radiator has been designed and manufactured with the bars open on one side to ensure easy towel hanging for both standing or seated users.

The radiator is reversible to allow opening on either side to make it easier than ever to design or refurbish any bathroom or wetroom.

With the option to use as a dual fuel system (order the electric element separately) allowing you to use the radiator all year round, or you can run the radiator via the electric heating element only.

Key benefits:

- Bars open on one side to ensure easy towel hanging
- Reversible to allow opening on either side
- Dual fuel option, requires 400W heating element (order separately)
- Chrome and Colour matching valves are available (order separately)
- The bars are open on one side to ensure easy hanging of towels
- Four colour options available: Gunmetal, Obsidian, Matt White, or Smoke

Technical details:

- Flat tube steel open sided towel rail (mm): 10 x 50
- Optional dual fuel
- Output at 50°C (BTU): 2201
- Recommended heating element (W): 400
- Overall height (not including inlet pipes) (mm): 1260
- Overall width (mm): 550
- Inlet pipe centres (mm): 50
- CE Approved and tested to BS EN442
- **Please note due to the manufacturing process the width and height dimensions are ± 2mm**

Guarantee:

- 5 Year Guarantee

Note:

- The chrome valves shown in the installed example image are not included
