## Description

AKW floor tiling kit for all Mullan shower trays, replaces the vinyl floor profile to create a fully waterproof joint between the tiled floor and tray.

The standard Mullen shower tray has a channel to accept vinyl flooring around two sides. This extends outside the shower screen area by 50mm (2") on one side and 50mm (2") on the other side.

When floor tiles are to be used this floor tiling strip is required, which is easy to fit.

The flat underside of the Mullen shower tray is 30mm (1 3/16") below the finished floor surface. The screen flat mounting area on the top of the shower tray is level with the finished floor surface.

### Technical details:

- If entering A and B dimensions a Floor tiling corner block will be supplied
- Requires mastic for installation (not included)
- Please read the PDF installation instructions for more information

### Note:

- This product is custom made and non-returnable
