Product Code: 01950WH

Product Images

Description

The AKW heavy duty plastic fluted grab rail 1067mm white. Constructed from high quality uPVC and an aluminium tubular core providing the grab rail with strength and durability alongside 5 fixing points for additional strength and stability. The 38mm rail to wall clearance provides an easier grasp for users with limited dexterity.

Key benefits:

- Fluted rail ensures additional grip when hands are wet
- Easy grasp for users with limited dexterity
- Captive flange covers improve the overall finish
- 5 Fixing points for added strength and stability
- Doc M compliant
- Matching AKW grabrails and accessories also available

Technical details:

- Overall length (mm): 1067
- Rail diameter (mm): 32
- Rosette diameter (mm): 90
- Rail to wall clearance (mm): 38
- Concealed fixings
- Maximum load of 190kg / 30 stone this refers to grabrail only

Please note:

- Fixings are not included and the installer should select the correct fixing based on wall type
