

RADAR NKS Lock Set - Right Handed

Product Code: 4B10201

Product Images

Description

Suitable for the National Key Scheme (NKS), a complete lock set comprising a 6-lever Mortice lock and engraved furniture.

Supplied in polished aluminium (P.A.A.), incorporating an external indicator and emergency coin release.

This is the right handed version of the RADAR NKS lock set.

All lock sets are supplied with a bow handle RADAR NKS key.

Fixings are also included.

Handing:

To determine which hand is required, select the lock set as follows:

Standing inside the toilet...

- If the hinges are on the right - you will need a right hand lock set
- If the hinges are on the left - you will need a left hand lock set

Operation:

- Door opens from the outside by use of any NKS key, when the external indicator is white
- Once inside, the door is locked by lifting the lever upwards, which changes the external indicator to red
- The keys will not unlock door when the indicator shows red
- On exiting, the door is opened by pushing the lever down, which also returns the external indicator to white

Please note:

- Lever handle should be fitted between 800-1050mm above the floor (900mm preferred)
- These locks are suitable for internal use only
