baskets. The rear baskets automatically follow the front baskets when the door is opened and pulled away from the cabinet.

When opening the cabinet door, the front baskets automatically swing away leaving free access to the back basket, making all baskets easily accessible when the unit is fully opened.

The integrated damping ensures quiet, smooth closing of the pull out, thanks to the integrated shock absorption and self closure.

The door front fixing has an integrated 3D adjustment and central height alignment allowing the swing out corner storage unit to be fitted perfectly.

The baskets are individually height-adjustable, each basket has a payload maximum capacity of 8kg per front basket and 9.5kg for each rear basket.

Suitable for 900 and 1000mm wide left handed corner base units, the set contains all the components needed for an easy installation.

This is the left handed configuration of the unit, please check your handing prior to ordering.
