## Description

---

This safety pack contains 4 x micro switches and cables needed to create your own custom safety trip panel, from materials and colours to match your kitchen installation.

The micro switches in the safety trip panel will be activated, if the panel is pressed or hits an obstruction on the work surface i.e. glass, cup or hand. The Diago will rise upwards until the micro switches are deactivated.

The safety stop panel should be fixed to the underside of your wall cabinet(s) in accordance with the assembly instructions.

Compatible with the Diago 504 systems, all installation instructions and cutting measurements are supplied
